I'm a Software Engineer. Software Engineering for me started as a passion. I've always been curious about how the computers works since the first day experienced the magic. This led me to pursuing a career as a front-end developer. In my spare time, write articles about frontend engineering and programming in general. Skills/Interests: JavaScript, React, NextJs, Typescript, GraphQL, Scss, Firebase, Redux, Sass, Data structures and Algorithms, Material ui, HTML, UI &UX , Objective C, git, python.

EDUCATION

BSc. Physics, University of Lagos , **Harvard CS50**

Skills/Interests

-JavaScript, Python, C, c#(With Unity), -WordPress, Wix, -Squarespace Sanity, Material Ui, SCSS, CSS	-React, Next js, Axios, Redux , UI/UX, firebase, -GraphQL, Spine, Figma	AUX -git, node js, express, Typescript, Rest API's
---	--	--

EXPERIENCE

De supreme ventures limited – Lagos.

desuprime@gmail.com

Created beautiful user interfaces with HTML, CSS, JavaScript && React. Created UI's that are aesthetically pleasing and intuitive for users. Retrieved data from backend API's.

Freelancer – Remote.

Wrote articles about frontend engineering and how to use libraries and SDK's. Worked with a team and created a scalable e-commerce store for a client

WORK

E-commerce store - <https://sharon-clothing-store.herokuapp.com/>

Created a fully functional e-commerce store similar to Amazon with over 100 users.

-Integrated PayPal API, google map API, Cloudinary API. created backend API's for listing products, search and filter for products. Designed the front-end with React & bootstrap. Managed states in the web app with reducer hooks. Etc

Banking website { front-end design } - <https://splendorous-squirrel-ca895c.netlify.app/>

Dad jokes - <https://kinyichukwu.github.io/Interacting-with-Joke-API/>
